2014–2019
Coursework completed

Responsive Web Design
freeCodeCamp · 2018

Languages

Spanish	Native
English	C1

Reviews

Exceptional	2025
Outperforms	2024

Summary

7 years designing digital products, 4+ in fintech. First in-house product designer at Camino Financial (now Quantum Lending Solutions): designed servicing, underwriting, partner and borrower workflows, and built the design system with engineering.

Experience

Quantum Lending Solutions — Jan 2022 – Sep 2026
Product Designer · formerly Camino Financial · Remote
API-first SMB lending infrastructure for banks, credit unions and fintechs.

SERVICING AND UNDERWRITING TOOLS

- Interviewed and observed agents and underwriters; designed Quantum Hub, consolidating accounts, payments, draws, documents and locks.
- Bulk actions replaced one-by-one processing (~70 accounts per agent a day, est.), credited with significant efficiency gains.
- Designed Cash Flow Analysis and Pre-Underwriting for ~30 underwriters, incl. a trend chart I proposed that shipped.

PARTNER AND BORROWER PRODUCTS

- Co-designed Partner Center for 250+ partners, including US Bank and SoFi; its developer tools were in QA at my departure.
- Designed borrower payment and draw flows, magic-link document requests and embedded-Plaid contracts.

DESIGN FUNCTION, SYSTEMS AND AI

- First in-house product designer: built the design function from zero and grew it into a two-person team.
- Built the Quantum UI Kit from scratch, shipped as a coded library across all products; formal UI approver in Chromatic.
- Wrote product requirements in Jira for engineering and reviewed scope with the product lead before handoff.
- Rebuilt the design process around AI (2026), prototyping only from the UI Kit; tasks from ~1 week to 2–3 days (est.).

Earlier experience

Pictivoro — May 2019 – Jan 2022
Web UI Designer · Chowbotics kiosk UI

ClickBus Mexico — Oct 2017 – Apr 2019
Graphic Content Creator & Web Designer

Trópicos Collective — Oct 2016 – Jun 2017
Graphic Content Creator
